

# At home page.

## ***Personal, social and emotional development; Knowledge and understanding of the world;***

At pre-school we are talking all about me, looking at ourselves and our families, developing our knowledge of communities and people and places around the world and how they live.

We would welcome any input, like photo's, pictures etc to contribute to our display, as well as any input or ideas to support our learning about families.

You can continue this at home by looking at family albums, visiting the library and looking at books about families.

## ***Communication, language and literacy;***

We are reading goldilocks and the three bears, you can also read this at home and continue learning with role play and acting out stories.

You can also bring in your child's favourite books to read at nursery.

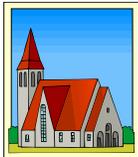

## ***Physical Development;***

We are looking at balance and co-ordination, developing skills with assault courses and playing on the climbing equipment both indoors and at the park, when you take your children to the park you can also continue encouraging and supporting them climb and balance, become aware of the space and objects around them.

## ***Problem solving, reasoning and numeracy;***

We are looking at recognising shapes and numbers in the environment, when out and about encourage your child to look at the shapes of signs, houses, windows etc and find numbers on buses, shops, sign posts etc.

## ***Creative development;***

We are thinking and talking about expression and interpretation, when your child is being creative whether with painting, drawing, dolls or littlest pet shop encourage them to talk about what they are doing and why, you can ask questions or join in play offering your own creative ideas.

We would also welcome any contributions for our junk modeling, any boxes cartons etc. Thank you.
