

18th March 2020

Dear Parents,

In light of recent events, we like to share with you our current crisis plan to battle COVID-19. If anyone in your household is showing signs or symptoms such as a cough and high temperature the current government guideline is to self-isolate the whole house for 14 days, please go on the link to find further information www.gov.uk/government/topical-events/coronavirus-covid-19-uk-government-response. In regards to staff the same rule applies, if there are too many staff off in isolation, we have to assess the situation on a daily basis of how many children we will be allowed in by law regarding staff to child ratio. Parents who are still working will have priority over parents who are able to stay at home. We understand this could be a difficult and uncertain time for many families and businesses, but we want to do the best for everyone regarding children and adults health and well-being.

If a child or adult is sent home with suspected symptoms, the nursery will close for a day to deep clean and will be open the following day, unless there is further information from the government telling us to close down.

Again, this is a day to day operation and we are keeping up to date with government guidelines as the days go on.

We'd like to thank you all for your co-operation and understanding in this worrying time. And we hope everyone stays healthy and safe!

Yours Sincerely

Smiles Daycare
